5. *The industry segments in which we operate being fragmented, we face competition from other large and small players, which may affect our business operations and financial conditions*

We compete in packaging industry on the basis of the quality of our products, price, and customer satisfaction. The industry in which we operate is highly competitive. Our competitors vary in size, and may have greater financial, production, marketing, personnel and other resources than us and certain of our competitors have a longer history of established businesses and reputations in the Indian packaging industry as compared with us. Competitive conditions in some of our segments have caused us to realise lower net selling prices and reduced gross margins and net earnings. These conditions may continue indefinitely. Our failure to compete effectively, including any delay in responding to changes in the industry and market, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability. 11. *Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.*

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past, we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

12. *Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition.*

Quality control is vital element for our sector. Any rapid change in our customers' expectation on account of changes in technology or introduction of new product or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. Any failure on our part to successfully meet customer demand or preference may negatively affect our business, results of operation and financial condition.

13. We have not entered into any long term or definitive agreements with our customers. If our customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected

We have not entered into any long term or definitive agreements with our customers and instead rely on purchase orders to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalization, and should such an amend mentor cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Our customers do not, typically, place firm purchase orders until a short time before the products are required from us as a result of which, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production or sales. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences.

Additionally, our customers have standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers' expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, lack of adequate production capacity, failure or delay in plant start up, breakdown of machinery, etc. and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition.

14. Introduction of alternative packaging materials caused by changes in technology or consumer preferences may affect demand for our existing products which may adversely affect our financial results and business prospects.

Our products are used mainly by companies who require packaging materials for cements, chemicals, food grains, sugars, polymers, agriculture, and others. Our business is affected by change in technology, consumer preferences, market perception of brand, attractiveness, convenience, safety and environmental norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers' businesses and, in turn, will affect the demand for our products. Any failure to forecast and/or meet the changing demands of packaging businesses and consumer preferences may have an adverse effect on our business, profitability and growth prospects.

15. Our insurance policies may not be adequate to cover all losses incurred in our business. An inability to maintain adequate insurance cover to protect us from material adverse incidents in connection with our business may adversely affect our operations and profitability.

Our operations are subject to certain hazards such as work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions, including hazards that may cause destruction of property and inventory. Our principal types of insurance coverage include coverage for our stocks that includes all normal risks associated with our business, including fire, burglary We typically maintain standard fire and burglary insurance policies for our stocks, building, plant and machineries and marine insurance policies for transit of goods. These insurance policies are generally valid for a year and are renewed annually. Our insurance may not be adequate to completely cover any or all of our risks and liabilities. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our inability to maintain adequate insurance cover in connection with our business could adversely affect our operations and profitability. To the extent that we suffer loss or damage as a result of such events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further information on our insurance arrangements, see "***Our Business – Insurance***" beginning on page 84.

16. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 64 of this Draft Prospectus.

17. We require several approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of “SPP Polymer Limited” from “SPP Polymer Private Limited” or “SPP Food Products Private Limited” pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We require several approvals, licenses, registrations and permits in ordinary course of our business. Additionally, we need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. Also, we were a private limited company in the name of “SPP Polymer Private Limited” which was carrying business. After complying with the relevant procedure of Companies Act, 2013, the said private limited company was converted into a public limited company in the year 2023. After conversion there was change of name of the company from “SPP Polymer Private Limited” to “SPP Polymer Limited”. We shall be taking necessary steps for transferring the approvals in new name of our Company. Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. For more information, please refer to chapter titled “*Government and Other Statutory Approvals*” on beginning of the page 183 of this Draft Prospectus.

18. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew certain approvals, licenses, registration and permits from time to time from the different regulatory authorities, some of which may expire and for which we may have to make an application for its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory can impose fine on our company or suspend and/or cancel the approval/licenses which may affect our business and reputation adversely.

For more information about the licenses required in our business, please refer section "Government and other statutory approvals" beginning on page no 183 of this Draft Prospectus.

19. We have certain contingent liabilities that have not been provided for in our Company’s financials which if materialised, could adversely affect our financial condition.

20. There is an increased awareness towards controlling pollution and many economies including India have joined in the efforts to ban plastic product. In case any plastic packaging products manufactured by us are banned in India or in any of the markets where we export our products, it could have a material and adverse effect on our business and results of operations.

Plastic takes many years to decompose and is very dangerous for other living beings. Many countries around the world are finding alternatives to the use of plastic products. While none of the measures taken so far have directly impacted our business in our country, our Company cannot assure that future measures of Central/State Government will not have a negative impact on our business. If the Government of India legislates against the use of plastic products or if regulations for the manufacture and use of our packaging products are made more stringent, it could have a material and adverse effect on our business and results of operations.

21. Our Company does not have intellectual property rights over its corporate logo .

We have our corporate logo in the name and style of , but the same is not registered with the Trade Marks and patents Authority. We have applied for registration of the same with the Trade Marks and patents Authority under class 22,23, and 24. Currently, our logo is not Registered with the Authority, we have applied for its registration with Trade Marks and patents Authority. In absence of our Registered Logo or Trademark there are chances of getting damage to our business prospects, reputation and goodwill and misuse of our designs and logo also. For further details on Intellectual Properties, please see page no. 183 in the chapter “Government and other Statutory Approval” of this Draft Prospectus

22. We depend on third parties for our suppliers, logistics and transportation needs. Any disruptions in the same may adversely affect our operations, business, cash flows and financial condition.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our distribution centres to various stores Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage, shrinkage and our inability to claim insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

We rely on third party suppliers for our business. We are exposed to the risk of these suppliers, third party manufacturers and service providers failing to adhere to the standards set for them by us and statutory and/ or regulatory bodies in respect of factors such as quality, quantum of production, weights and measures and safety standards and noncompliance of relevant rules and regulations, and any consequent action by such statutory and/ or regulatory bodies or otherwise, could adversely affect our business operations, results of operations, cash flows and financial condition, due to reasons such as shortage of supply, product liability claims and product recalls. Although we have not experienced such instances of liability claims and product recall in the past, there can be no assurance, that this may not happen in future and in such events, it may also result in lost confidence on the part of our customers and adversely affect our reputation. Further, any delay or failure to deliver the products in a timely manner, would result in adverse effect on our business operations, results of operation, cash flows and financial condition. Any litigation involving such third parties may cause a material adverse effect on our reputation.

23. We may be unable to comply with changes in environmental, health and safety, labour laws and other applicable regulations

We are subject to various laws and regulations in relation to environmental protection, such as the Water Act, Air Act, as well as environmental laws and regulations, health and safety laws, and labour laws. These laws and regulations impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our manufacturing operations. We are also subject to the laws and regulations governing employees, including in relation to minimum wage and maximum working hours, overtime, working conditions, hiring and termination of

employees, and work permits. For details on such regulations and policies applicable to our business, see “**Key Regulations and Policies**” beginning on page no. 103 of this Draft Prospectus.

Laws and regulations may limit the amount of hazardous and pollutant discharge that our manufacturing facility may release into the air, soil and water. The discharge of materials that are chemical in nature or of other hazardous substances into the air, soil or water beyond these limits may cause us to be liable to regulatory bodies or third parties. Any of the foregoing could subject us to litigation, which could increase contingent costs, require considerable attention from the management, and adversely affect our reputation in the event we were found liable. Additionally, the government or the relevant regulatory bodies may require us to shut down our manufacturing plants, which in turn could lead to product shortages that delay or prevent us from fulfilling our obligations to customers. Furthermore, in the event our manufacturing activities are shut down or suspended, we may continue to incur costs including those incurred to comply with regulations, appeal regulatory decisions, and compensate our workforce.

24. Any inability to address changing industry standards and consumer trends may adversely affect our business, results of operations and financial condition.

The future success of our business will depend in part on our ability to respond to technological advances, customer preferences and emerging industry standards and practices in a cost-effective and timely manner. The development and implementation of such new technology entails technical and business risks. We may have to incur substantial capital investment to upgrade our equipment and manufacturing facilities. While we continue to invest in various product development initiatives, adopt enhanced technologies and processes for the development of new products, we are subject to general risks associated with introduction and implementation of new products including the lack of market acceptance and delays in product development. There can be no assurance that we will be able to successfully develop new products or that such new products will receive market acceptance or adapt our manufacturing processes to incorporate new technologies or address changing consumer trends or emerging industry standards. Any rapid change in the expectations of our customers, in our business on account of changes in technology or introduction of new alternate products could adversely affect our business, results of operations and financial condition.

25. Our Promoter, director and member of the Promoter Group have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoter, executive director and associated concerns have provided personal guarantees in relation to certain loan facilities availed of by us. Umesh Goyal, Dipak Goyal, Mahavir Bahety and Liladhar Mundhara have given personal guarantee in favour of State Bank of India. In the event that guarantee is revoked, we may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. In the past there has been no instances where personal guarantees given by the promoters were revoked or invoked. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition. Even in case of a default under our loan agreements, any of the personal guarantees provided by our directors may be invoked and/ or the collateral may also be enforced, which could negatively impact the reputation and net worth of the Director. Accordingly, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our directors may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company.

26. Our Promoters and Key Managerial Person play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that they remain associated with us.

Our success also depends upon the continued services of our promoters and Key Managerial Persons and our ability to retain them. They are actively involved in marketing of the Company, timely execution of the orders and ensures that the quality control standards. Our Promoters, along with the group key managerial personnel, have over the years build relations with clients, government agencies and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Further, our Promoters are associated with other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional

costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

27. Certain information contained in this Draft Prospectus is based on management estimates and we cannot assure you of the completeness or accuracy of the data.

Certain information contained in this Draft Prospectus like our funding requirements and our proposed use of issue proceeds is based solely on management estimates. The estimated project dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities or claims with respect to title of land, the ability of third parties to complete their services, delays, cost overruns or modifications to our ongoing and planned projects. Such circumstances can have an impact on our financial condition and results of operation.

28. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. For details of our dividend history, see “***Dividend Policy***” on page 133 of this Draft Prospectus.

29. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

30. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

In terms of Regulation 41 of SEBI (ICDR) (Amendment) Regulations, 2022, as amended, appointment of monitoring agency is required only for Issue size above Rs. 100 cr. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE.

31. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or another independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be changed subject to the approval of shareholders by passing special resolution pursuant to section 27 of Companies Act, 2013 through postal ballot or subject to an authority given by the Company in general meeting by way of special resolution and based on various factors which are beyond our control. For further details, please see the section titled “Objects of the Issue” beginning on page no. 64 of this Draft Prospectus.

32. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own [●] % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

33. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. Although we have not had this kind of instances in the past, there can be no assurance that we will be able to detect or deter such misconduct future. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to face claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

EXTERNAL RISK FACTORS

35. You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

36. The requirements of being a listed company may strain our resources.

We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and limited reviewed half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over

financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

37. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled "***Key Industry Regulations and Policies***" beginning on page no. 103 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

38. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

39. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

40. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

41. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Interactive Financial Services Limited as Lead Manager and also appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

42. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and

trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

43. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹ [●]. This price is based on numerous factors (For further information, please refer chapter titled “***Basis for Issue Price***” beginning on page no. 71 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

44. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

45. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

46. Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.

The current Covid-19 pandemic had brought the world to a standstill affecting all sectors and the livelihood of many are at stake including the Indian economy. However, our Country is achieving normalcy by various measures taken by the Government. The pandemic is still to be controlled and any major outbreak will seriously impact our business. Further, our Country in the past has experienced natural calamities such as earthquakes, tsunami, floods etc. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

47. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of

our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

48. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

49. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

50. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of NSE in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

INDIAN ECONOMY GROWTH

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices (2011-12) in the first quarter of 2023-24 is estimated at Rs. 40.37 trillion (US\$ 484.94 billion), showing a growth of 7.8% as compared to the first quarter of 2022-23 estimated at Rs. 37.44 trillion (US\$ 449.74 billion). Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. In 2023-24 (April-September), India's service exports stood at US\$ 164.89 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April - September) were estimated at US\$ 376.29 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 301.75 trillion (US\$ 3.62 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q1 of 2023-24 was Rs. 70.67 trillion (US\$ 848.92 billion), as against Rs. 65.42 trillion (US\$ 785.85 billion) in 2022-23, estimating a growth of 8%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

INDIA'S PAPER AND PACKAGING INDUSTRY

Introduction

Packaging is an essential component of almost every product. A product's packaging acts as an 'eye catcher', allowing it to stand out from competing goods in today's market environment, which faces stiff competition, and therefore, an edge is required for the product to outshine its rival. Packaging is also instrumental in conveying the product's message to consumers and helps in establishing the visual appeal of a brand; hence, marketers view product packaging as the best possible opportunity to attract consumers to their product. Moreover, the product's packaging is designed to capitalise on the impulse shopping behaviour, especially in large super market chains that account for a significant proportion of purchases made by an average consumer. The main functions of packaging besides marketing is to transmit information, protect the product, provide convenience and add security. Paper and paper products are a major source of materials used to package goods. Paper finds application in packaging due to the many environmental concerns arising from plastic usage. The capacity to recycle paper more than once, along with how simple it is to deal with it as a waste product, serves as an essential method of reducing pollution and costs to an extent.

Types of Packaging

The packaging industry can be categorised into two segments: flexible and rigid.

- The rigid sector accounts for 36% of India's total packaging. Corrugated and paperboard boxes are an example of a rigid packaging category that are made using paper as a raw material. These boxes are considered to be one of the safest and most effective methods for packaging and transporting goods. The cellular structure of corrugated boxes, in addition to being lightweight, has great compressive strength, toughness and impact resistance. The procedure of lining, laminating or coating the boxes can assist them to withstand moisture and other harmful elements, protecting the quality and longevity of the product. The packaging of both industrial and consumer items requires corrugated board boxes. They are used for packaging a variety of commodities including textiles, fruits, vegetables, potteries, chemicals and pharmaceuticals.
- The flexible sector comprises 64% of the total packaging. The application of paper in flexible packaging is in the form of bags, sachets, envelopes and so on. The flexible pouch market, which enables small-quantity packaging, has gained momentum due to demand for small packs. Compared to other types of packaging, flexible paper packaging is less expensive, requires less material and is lighter in weight. Flexible paper packaging has become more popular as a result of its high efficiency and low cost. Flexible packaging is a crucial component of versatile packaging, which includes packaging for food and drink, personal care, home care and healthcare, among others.

India Packaging Industry Overview

The paper and packaging sector in India is growing rapidly and has significant potential for future expansion. The industry was valued at \$50.5 billion in 2019 and is anticipated to reach \$204.81 billion by 2025, registering a CAGR of 26.7% from 2020 to 2025. The growth in the sector is being driven by a surge in e-commerce, food processing, pharmaceuticals, FMCG, manufacturing industry and healthcare sector. Additionally, numerous government initiatives including 'Make in India' had positive impact on the packaging industry. The paper and packaging industry is currently the fifth largest sector in the Indian economy and has the potential to achieve pricing levels that are about 40% cheaper compared to European regions.

The Indian packaging sector has distinguished itself with its exports of flattened cans, printed sheets and components, crown cork, lug caps, plastic film laminates, craft paper, paper board and packaging machinery. The packaging segment with the fastest growth include laminates and flexible packaging, particularly PET and weaved sacks.

India uses paper as a major source of packaging. The paper industry accounts for 5% of global production. Demand for paper continues to rise for the packaging of FMCG products and ready-to-eat food. Packaging-grade paper accounts for 55% of the main types of paper produced domestically in the paper and paperboard industry.

Growing Exports of Packaging Material

India is emerging as a key exporter of packaging materials in the global market. The export of packaging materials from India grew at a CAGR of 9.9% to US\$ 1,119 million in 2021-22 from US\$ 844 million in 2018-19. US remains the major export destination for the packaging industry, followed by the UK, the UAE, Netherlands, and Germany.

Sectors of Application:

The packaging has applications in multiple sectors, two of which key sectors are:

- **Pharmaceutical:** India boasts of one of the world's largest pharmaceutical markets and therefore produces a huge quantity of plastic pharmaceutical packaging to cater to the needs of the fast-growing sector. In the [pharmaceutical industry](#), blister packs are one of the most popular types of packaging. Blister packs are used for tablets, ampoules, syringes and vials, and also used for individual packaging for medication doses while maintaining the integrity of other doses. Primary, secondary and tertiary packaging are the three tiers of packaging typically used in the pharmaceutical sector, and the type of application depends on the drug. The material that initially covers and holds the product is referred to as the primary packaging system. This includes all the package elements and sub-elements that come into contact with the product or that may have an impact on its duration of life, such as ampoules and vials, prefilled syringes, IV containers and blister packs. Key players in the pharmaceutical packaging include West Pharmaceuticals, Huhtamaki PPL Ltd and SGD Pharma India Ltd.
- **Food and Beverage Packaging:** India has seen a rise in the paper and packaging of food and beverage with an increase in demand, along with new companies in the food and beverage space. The entry and meteoric rise of food delivery service companies such as Zomato and Swiggy have led to growth in the consumption of packaging used for food and beverage. Zomato had even introduced tamper-proof packaging to keep the food safe and fresh. Food packaging has seen significant innovations that focus on highlighting the brand while maintaining the quality and standard of the food product contained within. There is intense competition among local manufacturers to produce cutting-edge products and stand up to MNCs that have a dedicated R&D department to test and eventually deploy the latest technologies. The major players in this space are Evirocor, Tetra Pak and Vinayak Ultra Flex.

Government Initiative

The government has launched the National Packaging initiative which focuses on the following measures to promote the sector:

- Set up guidelines and certain requirements for design and material of packaging used
- Promote the process of moving in bulk quantities
- Focus on promotion of centralised industrial activity by encouraging application of necessary and sophisticated infrastructure such as specialised logistic parks with appropriate facilities as well as packaging labs to work on designs and carry out tests
- Encourage processes to reduce packaging waste by establishing material recovery facilities (MRFs)
- Support domestic business to manufacture sophisticated packaging materials
- Develop training facilities and certified programmes of the highest order to maintain availability of skilled labour

Road Ahead

The Indian packaging sector is diverse and caters to a broad sector of industries and products. The government, through its positive promotion of the Make in India policy, has set the packaging sector to grow rapidly due to companies setting up their manufacturing units in the country and using these domestic facilities as a base to export to other countries. The government has implemented a strategy to lower tax rates for new manufacturing companies in order to turn India into a global manufacturing hub. Furthermore, given the need for domestic firms to compete with MNCs, the government is planning to further level the sector among players by launching various initiatives with the aim of promoting the development of packaging, along with technological advancements.

Following are the objectives of the National Environmental Policy:

1. Conservation of Critical Environmental Resources
2. Intra-generational Equity: Livelihood Security for the Poor
3. Inter-generational Equity
4. Integration of Environmental Concerns in Economic and Social Development
5. Efficiency in Environmental Resource Use
6. Environmental Governance
7. Enhancement of resources for Environmental Conservation.

The Company is primarily engaged into the business of manufacturing and trading of HDPE/PP Woven Fabric & Bags.

(B) Basis of Preparation of Financial Statement

The Restated Statement of Assets and Liabilities of the Company as on October 31, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the financial year / period ended on October 31, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 and the annexure thereto (collectively, the “Restated Financial Statements”) have been compiled by the management from the Financial Statements of the Company for the financial year / period ended on October 31, 2023, March 31, 2023, March 31, 2022 and March 31, 2021.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

(C) Significant Accounting Policies**1) Use of Estimates:**

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

2) Property, Plant & Equipments & Depreciation:**Tangible Assets:**

All items of Property, Plant & Equipments are stated at historical cost less accumulated depreciation and accumulated impairment loss, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset’s carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance expenses are charged to profit or loss during the reporting period in which they are incurred. Depreciation on fixed assets is provided on pro rata basis as per Written Down Value Method based on the estimated useful life of various assets, as specified in Schedule II of the Companies Act, 2013.

Intangible Assets:

An intangible asset is recognized when it is probable that the future economic benefits attributable to the asset will flow to the enterprise and where its cost can be reliably measured. Intangible assets are stated at cost of acquisition less accumulated amortization and impairment losses, if any. Cost comprises the purchase price and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes and allocated incidental expenditure during development / acquisition and exclusive of Input tax credit (IGST/CGST and SGST) or other tax credit available to the Company.

Subsequent expenditure relating to intangible assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Assets Acquired as Lease:

Leases under which the Entity assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

The cost of leasehold land is amortized over the period of the lease. Leasehold improvements and assets acquired on finance lease are amortized over the lease term or useful life, whichever is lower.

3) Impairment of Assets:

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value. Impairment loss is charged to the Statement of Profit and Loss in the year / period in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

4) Investments:

Investments, which are readily realizable and intended to be held for not more than 12 months from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments

5) Inventories : The inventories are valued on the following basis :

- a) Raw Materials, spare parts & consumables and goods in transit: Valued at Cost Price.
- b) Finished goods: Valued at lower of Cost or Net Realizable Value.
- c) Work-in-Progress/ semi-finished goods: Valued at lower of Cost or Net Realizable Value.
- d) Scraps are valued at net realizable value.

The premium or discount on forward exchange contracts is recognized in the statement of profit and loss over the period of the contract.

9) Accounting For Government Grants/Refunds:

Government grants/subsidies and refunds due from Government Authorities are accounted when there is reasonable certainty of their realization.

10) Taxation

Tax expenses comprise current tax (amount of tax for the period determined in accordance with the Income Tax Regulations in India) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date, Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realized in future; however, when there is unabsorbed depreciation or carry forward losses under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and written down or written up to reflect the amount that is reasonably / virtually certain, as the case may be, to be realized

Tax credit is recognised in respect of Minimum Alternate Tax (MAT) as per the provisions of Section 115JAA of the Income Tax Act, 1961 based on convincing evidence that the Company will pay normal income tax within the statutory time frame and is reviewed at each Balance Sheet date.

Company has policy of not considering MAT tax credit available to them under the Income Tax Act.

11) Borrowing Cost:

Borrowing Costs relating to the acquisition/construction of qualifying assets are capitalized until the time all substantial activities necessary to prepare the qualifying assets for their intended use are complete. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charge to revenue.

12) Earning Per Share:

Basic earnings per share is calculated by dividing the net profit after tax for the year / period attributable to Equity Shareholders of the Company by the weighted average number of Equity Shares outstanding at the end of the year / period. Diluted earnings per Share is calculated by dividing net profit attributable to equity Shareholders (after adjustment for diluted earnings) by average number of weighted equity shares outstanding at the end of the year / period.

13) Provisions, Contingent Liabilities & Contingent Assets:

The company recognizes as provisions, the liability being present obligations arising from past events, the settlement of which is expected to result in outflow of resources and which can be measured only by using a substantial degree of estimation. Contingent liabilities are disclosed by way of a note to the financial statement after careful evaluation by the management of the facts and legal aspect of the matters involved. Contingent assets are being neither recognized nor disclosed.

14) Current Assets, Loans And Advances

The balance under items of Sundry Debtors, Loans and Advances and current liabilities are subject to confirmation and reconciliation and consequential adjustments, wherever applicable. However, in the opinion of the Management, the realisable value of the current assets, loans and advances in the ordinary course of business will not be less than the value at which they are stated in the Balance Sheet.

15) Cash Flow

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows.
