SUMMARY OF INDUSTRY

Cashew – a native of Brazil was introduced to the world by the Portuguese. Portuguese spread this tree to other parts of the world, including India. In India, Cashew was first introduced in Goa during 16th century – the then Portuguese colony. It was noticed that the tree grew on poor sandy soils along the coastal belt and was used by the Portuguese in Africa and India as an anti-soil erosion measure. (Russel,1969; McGovern, 2001). The tree has prospered and spread naturally, particularly in east Africa and India and the crop from the progeny of these wild cashew trees form the basis of the raw material for the cashew industry. Even though initially Cashew trees were planted for preventing soil erosion, later on it was discovered that Cashew Kernels extracted out of Raw Cashew Nuts (RCN) was a valuable food ingredient. In fact, India was the first country which started commercial processing of Cashew Nuts. Today, India has the largest crop of cashews in the world.

The Cashew Tree (Scientific Name - Anacardium Occidentale) produces cashew nut, a kidney shaped fruit, called the nut, born exteriorly attached to the swollen fleshy peduncle called the Cashew Apple. The cashew fruit (Figure 1) is unusual in comparison with other tree nuts since the nut is outside the fruit. In its raw state, the shell of the nut is leathery, not brittle. It is this Raw Nut which is used for extracting Cashew Kernels.

Investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Draft Prospectus, including the risks and uncertainties described below and the Financial Statements incorporated in this Draft Prospectus, before making an investment in the Equity Shares of our Company. Any potential investor in, and subscribers of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled “Business Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 66 and 120, respectively of this Draft Prospectus, as well as the other financial and statistical information contained in this Draft Prospectus. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality therein:

- *Some risks may not be material at present but may have a material impact in the near future.*
- *Some risks may not be material individually but may be found material when considered collectively*
- *Some risks may have material impact qualitatively and not quantitatively and vice-versa*

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares and may also have an adverse effect on our business. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. Unless otherwise indicated, all financial information included herein are based on our Financial Statements. Please refer to the section titled “Restated Financial Statements” beginning on page 101 of this Draft Prospectus.

INTERNAL RISK FACTORS:

- 1. The top ten Buyers of Our Product and top ten suppliers for raw material contribute our total revenue and source of Raw Material. We do not have long term agreement with the customer or supplier. The loss of any Customer or a decrease in the volume of order by any customer or any disruption in supply of raw material by any supplier may adversely affect our revenues and profitability.***

The Company had taken running business of M/s Fortune Exports and in the partnership firm, we have relied upon top ten Buyers of Our Product and top ten suppliers for raw material for our revenue and source of raw material.

In the FY 2022-23 (upto November 30, 2022) the Revenue from top Five customers was 97.13% of the total turnover (including tax). The loss of any customer or a decrease in the volume of orders may severely affect our revenues and profitability, if we are unable to develop and maintain a continuing relationship with our key customer or develop and maintain relationships with other new customers. The loss of a significant customer or a number of significant customers due to any reason whether internal or external related to their business may have a material adverse effect on our business and results of operations. The Management is of the view that due to lower production capacity we are unable to fulfil the demand of our existing customers where in case of loss of

any customer we shall have ready buyer with us due to extremely high demand of the product. Any decline in our Quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them.

In the FY 2022-23 (upto November 30, 2022) the purchase of Raw Material from top 5 suppliers was 82.40% of the total purchase of material. The loss of any supplier due to any reason or disruption of the supply by the supplier, if we are not able to agree with the terms and conditions for the supply of material or we are not able to find the alternative supplier of raw material with same terms and conditions at which we are buying the material, may severely affect our revenue and profitably.

2. *We do not own registered office from which we operate.*

Our Registered Office is situated at 417, Orbit, B/h. Rajpath Club, Rajpath Road, Bodakdev, Ahmedabad. The registered office is not owned by us. Our company has taken premises on lease basis and has entered into lease agreement with Jagjeetkaur Ajay Sharma. The premises have been taken by us on lease for a period of 11 months and 29 days commencing from January 07, 2022 with a condition that both the parties to this agreement may renew after the expiration thereof. The Company had not renewed the Rent Agreement after the expiration of the same.

There can be no assurance that the term of the agreements will be either continued or renewed for further period, and in such event the lessor/licensor terminates or does not renew the agreements, we may require to vacate the registered office and identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability and Brand image also.

3. *Our factory premises are on rental basis.*

Our factory is situated at Shed No 7 and 8, Sadbhav Industrial Park, Village Dhamtavan, Tal. Daskroi, Dist. Ahmedabad. We have taken shed no. 7 on lease basis from Sunilbhai Jaggannath More and Harshadbhai Govindbhai Patel for a period 11 months and 29 days w.e.f. July 11, 2022 at a monthly rent of Rs.12,500/- p.m., however it can be renewed with 10% rise in rent if both the party agrees. We have taken Shed no. 8 on lease basis from Vaishali Zaverbhai Patel and Nitaben Zaverbhai Patel for a period 11 months w.e.f. April 01, 2022 at a monthly rent of Rs.40,000/- p.m., however it can be renewed with the 10% rise in the rent if both the party agrees.

There can be no assurance that the term of the lease agreements will be either continued or renewed for further period, and in such event the lessor/licensor terminates or does not renew the agreements, we may require to vacate the factory premises and identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of production, business, time overruns and may adversely affect our operations and profitability and Brand image also.

4. *We have expanded our production capacity from 150 TPA to 1200 TPA.*

In the Financial year 2022 inspired by the growth, demand of the product and acceptance of the product the firm had enhanced the cashew processing plant from 150 tonnes per annum to 1200 tons per annum. Our existing production capacity in 2022 was increased from 150 TPA to 1200 TPA, means production capacity is increased by 300%. To keep our factory operated at 100% capacity, we have to vigorously increased our marketing efforts and also expand our operation beyond the state of Gujarat. If we are not able to concentrate fully on marketing and increased our sales, our production capacity will be at underutilized level, which will adversely affect our turnover, revenue and profitability.

5. *If We are not able to procure Quality Raw Material in a timely manner, our business, results of Operations and financial conditions may be adversely affected.*

The main Raw Material required is Raw Cashew Nuts (RCN) for our products. The RCN is agro based product and are subject to price fluctuations as a result of seasonality, weather, demand in local and international market and other factors. We try to keep our raw material cost by timing our purchases and delivery months. We typically do not enter into long term supply arrangements for procurement of raw materials. We enter into short term contracts for procurement of raw material. Several criteria can be used to specify the cashew nuts quality such as colour, shape, brightness, exterior aspect. Our profitability will depend upon on our ability to anticipate and react to changes in the cost of our material and to procure raw material in time. If we are not able to procure the raw

material in timely manner, the cost of raw material will increase and we may not be able to get the desired quality of raw material and which will adversely affect our business, results of operation and financial conditions.

6. *The Processing of Raw Cashew nuts involve no of stages and during the process the cashew nuts broken.*

Raw Cashew Nuts are processed through number of stages, such as cleaning, Boiling and Cooling, De shelling, drying, Moistening and peeling, sorting, drying and grading. It consists of deshelling the raw cashew nutshell to free the kernel, without splitting the precious whole kernel, then various other process is to be done. During the above various stages of process Cashew Nuts may get broken. So whole process is required to be handled with utmost care by trained and skilled workers. If it is not handled with due care, during process the cashew nuts will be broken. If the percentage of such broken nuts are increased, we have to sell the broken cashew nuts at lesser price then what the whole cashew nut gets and it will have adverse effect on our sale and profitability.

7. *We have limited Geographical Presence in the market. Our operations are limited to the state of Gujarat.*

We are supplying our products to the wholesale customers spread over with the state of Gujarat. Looking to the good quality of our products, we are able to sale our entire production within Gujarat. We are supplying our products to the wholesalers only. The Company is not able to cater the demand of Gujarat State, hence it has not ventured to supply or develop market out of Gujarat. Recently the company had started supplying the cashew directly to the customers who are leading chain restaurant in the North India. In the event of any natural or manmade calamity in the state of Gujarat, our entire business operation comes to stand still. Under the circumstances our business, revenue and our profitability will be adversely affected.

8. *If we are unable to accurately estimate the demand for our products, our business, financial condition and results of operation may be adversely affected.*

The purchase of raw materials for our products is based primarily on forecasts, projections and requirements prepared by our marketing team. These forecasts are based on past sales as well as anticipated demand, which is based to a certain extent on the subjective assessment by our marketing team. If we are unable to accurately forecast demand for our products it would lead to excess supply or a shortage in supply of raw materials from our suppliers, which would have a material adverse impact on our business, financial condition and results of operations.

9. *If we are not able to attract and retain sufficient qualified and trained personnel at our processing and packaging units which may adversely affect our business.*

The processing of Raw Cashew nut required skilled employees so that the Company can get lee quantity of broken cashew nuts. The company has employed skilled stag for the processing of cashew nuts. The Company has to keep God Human Resources policy and the incentives to keep the skilled staff for a longer period. There can be no assurance that efficiency rates of our personnel will increase or maintained throughout their working. We have migrated from manual to automation in our plant however we still require Semi skilled Resources to perform the job which are readily available and enough resources are available to train them within our premises. Any significant adverse change efficiency in our personnel could also affect our productivity adversely, which may result in to loss of customers, revenue, profitability etc. If we are not able to replace the required skilled staff in case of labour unrest in timely manner then our business operation may be severely affected, financial condition and results of operations may be adversely affected.

10. *We are dependent on third party transportation service providers for delivery of raw material to us from our suppliers and delivery of our products to our customers.*

The supply of Raw material and delivery of goods in timely manner is the crux for the reputation of the Company, growth of business and retention of the customers. The demand for our products is high during the festival period and the customers want the delivery of goods in time. We have to rely upon third party transportation service providers for the delivery of raw material to us from our suppliers and delivery of our products to the customers. Any default or delay by the third-party transportation service providers in transporting the raw material or to deliver the same to our customers in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition. The hike in the fare by the third-party transportation service providers due to change in the Government Policy for fuel and if we are not able to transfer the hike in the price of the Finished Good to the customers the profitability of the Company will be affected.

Further, we have not entered into any agreements or contracts with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transporters services will be always timely available at reasonable rates, which could adversely affect our business, results of operations and financial condition.

11. Our Company has not entered into any written agreements or contracts with our customers for sale of our products.

We sale our major production to the wholesalers in the state of Gujarat. Generally, we do not sale our products to retailers or end-users directly. Though, we are directly dealing with the wholesalers, we have not entered in to any type of long/short agreement with any of the buyer. Though, we are getting order on regular basis from our customers, we cannot assure you that in future we will be getting the orders from all the customers on regular basis. In absence of any type of written agreement with our customers, we are always at the risk of losing customers in this competitive market. Loss of any of the significant customer will lead our company in to loss of business, revenue and financial conditions.

12. Any failure in our quality control and procurement process may adversely affect our business, results of operations and financial condition.

The success of our business depends upon the procurement of qualitative Raw Material from the market. several criteria can be used to specify the cashew nuts quality such as colour, shape, brightness, exterior aspect. The most important criterion is the quality of the kernel inside the shell. There are four main criteria used to assess the quality of the RCN: the Out-turn, the defective nut rate, the nut count, and moisture. We procure our raw material from the supplier of Gujarat who are importing from other countries and also from Kolam, Tuticorin and Manglore. We check the quality of RCN before buying from the suppliers. The quality of raw material has a direct impact on the quality of finished products If we are not able to maintain control on check of quality of raw material then our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations.

13. We have been recently converted into public limited company and any non-compliance with the provisions of Companies Act, 2013 may attract penalties against our Company which could impact our financial and operational performance and reputation.

The promoters of the Company were running the partnership firm and they have incorporated the Private Limited Company on January 22,2022.The Company was converted in to Limited Company pursuant to a special resolution passed by our shareholders at the EGM held on December 29, 2022 and consequently the name of our Company was changed to “Prospect Commodities Limited” and a fresh certificate of incorporation was issued by the Registrar of Companies, Ahmedabad dated January 03, 2023.However, consequent to the aforesaid conversion, our Company is required to observe compliance with various provisions pertaining to public limited companies of the Companies Act. Further, our Company is going to the public for further requirement of funds and needs to comply with provisions of SEBI ICDR Regulations and SEBI (LODR) Regulations. Though our Company will take due care to comply with the provisions of the Companies Act and other applicable laws and regulations. In case of our inability to timely comply with the requirements or in case of any delay, we may be subject to penal action from the concerned authorities which may have an adverse effect on our financial and operational performance and reputation.

14. The procurement of raw material is subject to seasonal factors. Consequently, our inability to accurately forecast demand for our products, may have an adverse effect on our business, results of operations, cash flows and financial condition.

RCN is an agricultural product and cultivation of the raw material is seasonal. The cashew nuts are harvested during February – May. On account of seasonality of the raw material forecast for the demand for the finished goods and procurement of raw material for production is very important. Any misjudgment in the procurement of Raw Material will result in to either out of stock raw material at competitive price or surplus in stock which will block the working capital funds in turn affect the business, result of operations, cash flow and financial conditions.

15. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.

The occurrence of natural disasters, including floods, earthquakes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition. The spread of pandemic diseases, or the occurrence of natural disasters, in India or the international markets from which our suppliers purchase, could restrict the level of economic activities generally or slow down or disrupt our business activities, which could in turn adversely affect our business, financial condition and results of operations.

16. Our ability to maintain our competitive position and to implement our business strategy is dependent to a significant extent on our senior management team and other key personnel, in particular, our Promoter.

We depend on our current senior management for the implementation of our strategy and the operation of our day-to-day activities. Furthermore, relationships of members of senior management are important to the conduct of our business. Competition for experienced management personnel in the business sectors we operate in is intense, the pool of qualified candidates is limited, and we may not be able to retain our senior executives or key personnel or attract and retain skilled senior executives or key personnel in the future. Consequently, there can be no assurance that these individuals will continue to make their services available to us in the future. Any significant loss of senior management or key personnel could materially and adversely affect our business, financial condition, results of operations and prospects. In addition, if any member of our senior management team or any of our other key personnel joins a competitor or forms a competing business unit, we may consequently lose our proprietary know-how for the benefit of our competitors. Our success depends heavily upon the continuing services of our Promoter who has been the leader since our inception. Our Promoter currently serves as our Managing Director and his experience and vision have played a key role in obtaining our current market position. If our Promoter is unable or unwilling to continue to serve in his present position, we may not be able to replace him with an executive of similar capacity or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

17. We have to update the name of our company in some of the statutory approvals and certificates due to the Change in the name upon conversion of our Company in to Public Limited Company.

Some of our statutory approvals and certificates are in the name of Prospect Commodities Private Limited. Since our Company has been converted from Private limited to Public Limited pursuant to a special resolution passed by our shareholders at the EGM held on December 29, 2022 and consequently the name of our Company was changed as “Prospect Commodities Limited” we have to update the name Prospect Commodities Limited on the statutory approvals and certificates. We cannot assure that we will be able to update the said documents in a timely manner.

18. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew certain approvals, licenses, registration and permits from time to time from the different domestic authorities and from different foreign countries, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory can impose fine on our company or suspend and/or cancel the approval/licenses which may affect our business adversely.

A BRIEF HISTORY:

Cashew – a native of Brazil was introduced to the world by the Portuguese. Portuguese spread this tree to other parts of the world, including India. In India, Cashew was first introduced in Goa during 16th century – the then Portuguese colony. It was noticed that the tree grew on poor sandy soils along the coastal belt and was used by the Portuguese in Africa and India as an anti-soil erosion measure. (Russel,1969; McGovern, 2001). The tree has prospered and spread naturally, particularly in east Africa and India and the crop from the progeny of these wild cashew trees form the basis of the raw material for the cashew industry. Even though initially Cashew trees were planted for preventing soil erosion, later on it was discovered that Cashew Kernels extracted out of Raw Cashew Nuts (RCN) was a valuable food ingredient. In fact, India was the first country which started commercial processing of Cashew Nuts. Today, India has the largest crop of cashews in the world.

The Cashew Tree (Scientific Name - *Anacardium Occidentale*) produces cashew nut, a kidney shaped fruit, called the nut, born exteriorly attached to the swollen fleshy peduncle called the Cashew Apple. The cashew fruit (Figure 1) is unusual in comparison with other tree nuts since the nut is outside the fruit. In its raw state, the shell of the nut is leathery, not brittle. It is this Raw Nut which is used for extracting Cashew Kernels.

THE CASHEW FRUIT WITH NUT OUTSIDE THE FRUIT

The Cashew Industry in India provides employment to more than 10 lakh people in farms and factories, most of them in the rural areas. Thus, apart from its economic significance, the cashew industry plays a leading role in social and financial upliftment of the rural India.

INDIA CASHEW INDUSTRY:

India is among the largest cashew-producing countries in the world. The cashew industry has large economic significance as it employs more than 10 lakh people on farms and factories in rural areas. The cultivation of cashew in India covers a total of 0.7 million hectares of land, and the country produces over 0.8 million tonnes (MT) annually. Between 2019-20 and 2021-22, India's cashew nut production grew from 0.70 million tonnes (MT) to 0.77 million tonnes (MT). In India, cashew cultivation spread along the coastal regions of the peninsula. Cashew is mainly grown in states like Maharashtra, Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Goa, Odessa, West Bengal, and some parts of the North-Eastern region. According to data published by the National Horticulture Board (NHB), Maharashtra stands first in annual cashew nut production during 2021-22 at 0.20 million tonnes (MT), growing from 0.19 million tonnes cashew nut produced in 2020-21.

Besides the vast scale of cashew production, India is also known for pioneering cashew processing and exporting cashew kernels across the globe. The cashew processing industry was earlier concentrated in Kollam (Kerala), Mangalore (Karnataka), Goa, and Vettapalam (Andhra Pradesh), but now it is spread across many states of India. Over the years, India has emerged as the global processing hub for the cashew industry.

STATE-WISE SHARE OF CASHEW PRODUCTION IN INDIA (2021-2022)

EXPORT TREND

India is the largest cashew exporter, with more than 15% of the world's export share. India primarily exports Cashew Kernels and very small quantities of Cashewnut shell liquid. During 2021-22, the cashew exports by value grew from US\$ 420 million in 2020-21 to US\$ 452 million in 2021-22, witnessing a growth of 7%. Between April-August 2022, cashew exports stood at US\$ 134.38 million.

In terms of volume, India's cashew exports recorded an increase of 9% from 70.5 million kg in 2020-21 to reach 76.8 million kg in 2021-22. Between April-August 2022, cashew exports volume stood at 18 million kg.

In March 2022, the country exported cashews worth US\$ 40.0 million, up from US\$ 33.6 million in February 2022.

Importing of raw cashew nuts has played a key role in the growth of the Indian cashew industry, which accounts for almost half of the domestic and export demand for cashew kernels in the country. To address the same, the Department of Agriculture, Cooperation and Farmers Welfare (DAC&FW), under the Mission for Integrated Development of Horticulture (MIDH) and Rashtriya Krishi Vikas Yojana (RKVY), had implemented various initiatives that led to increased domestic production of cashew. It includes massive area expansion under cashew cultivation and replacing senile cashew plantations with high-yielding varieties in traditional and non-traditional states. DAC&FW has also approved the roadmap program to extend the cashew cultivation area by 1.20 lakh hectare presented by the Directorate of Cashew nut & Cocoa Development (DCCD).

INDIA'S CASHEW EXPORT TREND (US \$ MILLION)

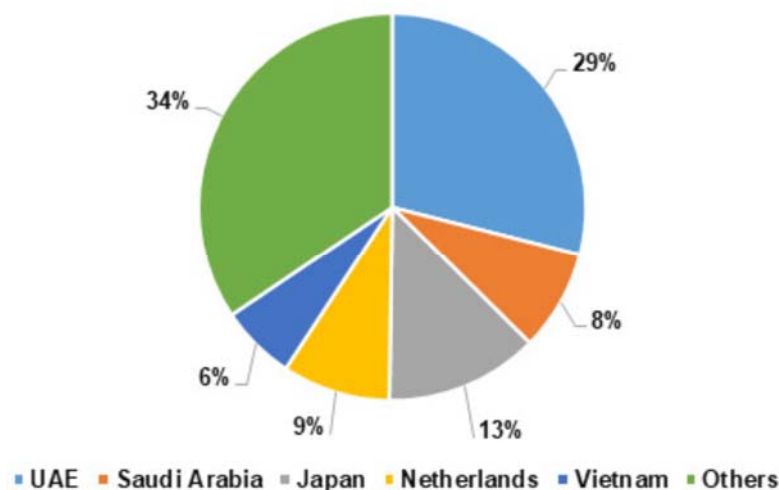

EXPORT DESTINATIONS

India exports cashews to over 60 countries spread across different parts of the world. The key export destinations for India are UAE, Japan, Netherland, Saudi Arabia, the USA, the UK, Canada, France, Israel, and Italy. As per the APEDA statistics on the exports of cashew kernels and Cashewnut shell liquid, UAE is the largest importer of Indian cashews, valued at US\$ 131.5 million, accounting for 29% of overall exports during 2021-22 as compared to US\$ 98.5 million in the previous year. In volume terms, India's cashew exports to UAE stood at 16.6 million kg, growing by 29% from 12.8 million kg of exports recorded in the previous year.

Japan and Netherland are among the top 3 importers of Indian cashews, with a share of exports at 13% and 9%, respectively. India's cashew kernels and Cashewnut shell liquid exports to Japan and Netherland are valued at US\$ 58.1 million and US\$ 41.1 million, respectively. Vietnam, a key importer of Indian cashews, has consistently grown in imports of India's cashew at a CAGR of 7% from 2016-17 to 2021-22. The top 10 importing countries of Indian cashew have a share of 84% of the total exports, which implies the huge significance of traditional markets. This strong growth in cashew exports across export destinations continues to drive economic growth and employment generation in India's key cashew-growing states.

GOVERNMENT INITIATIVES

The Government of India and the cashew export promotion council have undertaken several initiatives for the ease of exports and growth of the cashew industry. As non-financial assistance to exporters, many trade delegations, buyer-seller meets, fairs, development workshops, and research and development data are provided. Additionally, in 2018, the Basic Customs Duty on raw cashew nut was reduced to 2.5% from the previous 5%, and the Goods and Services Tax (GST) on the same was reduced to 5% from 12%.

As the cashew industry's domestic demand and exports are heavily dependent on imported raw cashew nuts, the Government of India has taken several steps to support efficient sourcing. These include:

- Changes in import policy for cashew kernel (both broken and whole)
- Revision of the standard inputs output norms (SION) for cashew exports
- Approval of Medium-Term Framework scheme for process mechanization and automation of cashew processing units with a financial outlay of Rs. 60 crore (US\$ 8 million)
- Allowing duty-free import of raw cashew nuts under Duty-Free Tariff Preference (DFTP) Scheme from least developed countries (LDCs)
- The government has also extended financial assistance to the Cashew Export Promotion Council of India (CEPCI) for organizing buyer-seller meet (BSM) and participation in international fairs under Market Access Initiative (MAI) scheme, which supports tapping new markets.

GOVERNMENT BODY

The Cashew Export Promotion Council of India (CEPCI)

The Government of India established the CEPCI in 1955 with the objective of promoting cashew kernels and cashew nut shell liquid in India. COVID-19

Due to COVID-19, the price of cashew fell to the lowest it has been in the last 10-12 years. The value addition activities were affected negatively as a disrupted distribution channel tends to lower the value of end-products of cashew nuts in the market. The extended lockdown has hit consumption in India as well as demand. The Cashew Export Promotion Council of India (CEPCI) has urged the Union Government to allocate sufficient funds and put forward a few schemes to increase the production of cashews in the country; this initiative is projected to drive the cashew market.

Process:

1. Cleaning:

The first processing operation is the removal of foreign matter and dirt from the nuts. Processing Raw Cashew Nuts into Dust Cleaner to remove Foreign Matters and Dirt and taking the material directly to Tank for Boiling.

2. Boiling and Cooling:

Once Raw Cashew Nuts are dust cleaned, it's getting load thru Elevator in Tank for steaming thru IBR. The process of steam boiling helps in soften the outer shell and removal of this shell with minimal effort. On completion of Boiling all nuts been offloaded in trolley and leave for cooling period.

3. De shelling:

De-shelling is at the heart of cashew processing. It consists of breaking the raw cashew nutshell to free the kernel, without splitting the precious whole kernel. We are using Hitech Cutting Machines to have minimum damage to kernel and to cut the Fruit. Once cutting is done, Elevator is taking the nut and shell on Scooping Line to separate Nut and Shell. At one end Nuts are being collected and at other end shells have been separated. Few Nuts which are not separated in 1st Process is taking into 2nd Vibrator to separate Nuts and Shell.

4. Drying:

Separated Nuts collected from Scooping Line are filling in Tray and Trolley and loaded in Dryer to remove Oil from Husk of the cashew. Drying process vary between 350 Minutes to 480 Minutes depending on the Raw Material.

5. Moisture and Peeling:

After completion of Drying, Trolley to be moved into Moisture chamber to give moisture to Nuts. Moisture helps Husk to soften where in Peeling Husk can be removed. General Moisture time is between 3 hours to 4 hours. After

Moisture, Trolley is moved to Peeling Machine to remove husk from it. All trays to be offload in hooper from where Elevator is taking Nuts into Peeling Machine as per the set time. In Peeling Machine, Approx 9 Kg of Air Pressure from Compressor helps to remove Husk from kernel and separate it from kernel. Kernel is moved into Separator where Broken kernel / Whole kernels are being separated.

6. Sorting:

After Peeling, All Kernels (Whether Whole or Broken) are being processed thru Colour Sorter to remove Rejection / Oily Kernel / Dotted Cashew Kernels / Kernels with Minimum Husk and to separate clean Kernels.

7. Drying:

After Colour Sorter we are again drying the material for couple of hours to remove moisture from kernels. This process helps us to remove moisture and to get the natural colour of Kernels which can be further process for grading with more accuracy.

8. Grading:

After sorting and Drying, Kernels have been processed thru Nano pix grading Machine. In this process, We are able to separate Kernels into Different Grades with the help of Hitech Camara used in this machine.

9. Manual Sorting and Grading:

After completion of Grading, Material is being given for manual sorting and grading to ensure on quality check prior to dispatch the material.

10. Drying before Dispatch:

Before packing the material, we always ensure to dry the material which makes each Kernel Crunchy and safe to eat.

11. Packing and Dispatch:

After drying we do weighing of each grade and do packing in 10 KG TIN with seal on it. We are using corrugated Boxes to pack 2 X 10 KG Tin in single Box and marking each Tin / Box with it's grade details and dispatching as per order.

• FOREIGN INVESTMENT RELATED LAWS AND REGULATIONS

Foreign investment in Indian securities is governed by the provisions of the Foreign Exchange Management Act, 1999 (FEMA) read with the applicable FEM Rules. FEMA replaced the erstwhile Foreign Exchange Regulation Act, 1973. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the government approval route, depending upon the sector in which foreign investment is sought to be made. The DIPP (now DPIIT) makes policy pronouncements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEM Rules. In case of any conflict, the FEM Rules prevail. Therefore, the regulatory framework, over a period of time consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DIPP (now DPIIT) issued the FDI Policy which consolidates the policy framework on FDI issued by DIPP (now DPIIT), in force on August 28, 2017 and reflects the FDI policy as on August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP (now DPIIT). As per the FDI Policy, FDI up to 100% is permitted in wholesale trading under automatic route and up to 51% is permitted in multi brand retail trading under the government route subject to certain conditions prescribed under FDI policy. Further, a citizen of Pakistan or an entity incorporated in Pakistan can invest, only under the Government route, in sectors/activities other than defence, space, atomic energy and sectors/activities prohibited for foreign investment.

The Foreign Exchange Management Act, 1999

Foreign investment in India is primarily governed by the provisions of the Foreign Exchange Management Act, 1999 (*FEMA*) and the rules, regulations and notifications thereunder, as issued by the Reserve Bank of India from time to time. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 by Notification No. FEMA. 395/2019-RB dated October 17, 2019 (*FEMA Rules*) to prohibit, restrict, or regulate transfer by or issue security to a person resident outside India. As laid down by the FEMA Rules, no prior consents and approvals are required from the RBI for Foreign Direct Investment (FDI) under the —automatic route within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the RBI. At present, the FDI Policy does not prescribe any cap on the foreign investments in the sector in which the Company operates. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA)

for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹500,000 shall use the UPI Mechanism.
